Redding, CA 96002

## TERMS & CONDITIONS

By signing and completing this form you are hereby authorizing **A&R Heating & Air Conditioning Inc.**, to draft the monthly investment either out of your checking account noted or out of your debit/credit card. You are also agreeing that you fully understand that the monthly fee(s) will continue until a written notice of termination is received by us from you. If the membership is terminated prior to the 1 year cycle, any visits already performed under the club membership will be due (if monthly fees have not covered it). Discounts received will be reversed and may be due upon termination. Allow up to 2 weeks for termination processing.

You are entitled to two visits per year for heating and air maintenance. **A&R Heating & Air Conditioning Inc.** will provide notification prior to the visit month to schedule the Club visits. However, it is the responsibility of you, the client, to return any missed calls or emails to ensure your maintenance or inspection is scheduled. The maintenance included with your club membership is intended to maintain efficient operation of heating and air conditioning. The maintenance excludes any repairs, recharging of refrigerant, or major cleaning needed that may be discovered by the technician. The cost to perform repairs and/or cleaning, as well as the cost of parts and labor recommended by the technician that may need to be replaced, would be an additional charge. No work that involves an additional fee will be performed without client consent.

In order to be eligible for the Veteran Plans, you must present a valid form of identification for one of the professions: Active Military or US Veteran.

**Veteran ID Number:** \_\_\_\_\_

### Heating Precision Tune-Up

- Clean and/or replace standard air filter
- Check thermostat
- Adjust gas pressure
- Clean and check burner assembly
- Clean and check pilot assembly
- Check ignition assembly
- Monitor flue draft
- Monitor heating cycle
- Check safety controls
- Check heat exchanger
- Check blower assembly
- Inspect and tighten electrical connections
- Lubricate motors
- Check air flow
- Check amp draw and volts
- Check for gas leaks
- Check vent pipe for leaks & obstructions
- Clean flame sensor
- Check circuit board operation
- Test capacitor level
- Measure temperature rise
- Ensure proper system operation

### Cooling Precision Tune-Up

- Clean and/or replace standard air filter
- Check thermostat
- Check air flow
- Clean condensing coil
- Clean debris out of condenser
- Inspect and tighten electrical connections
- Lubricate motors
- Check amp draw and volts
- Check evaporator (if accessible)
